

Davene R. Wright, PhD, Harvard Medical School & the Harvard Pilgrim Health Care Institute

Davene R. Wright, PhD is an Associate Professor in the Department of Population Medicine, a partnership between the Harvard Pilgrim Health Care Institute and Harvard Medical School. At Harvard, she serves as the Associate Director of the Division of Child Health Research and Policy

and Associate Director of the Harvard-Wide Pediatric Health Services Research Fellowship. Dr. Wright is a decision scientist with experience in health policy, health services research, health economics and outcomes research, and preference elicitation. Her research focuses on designing and promoting evidence-based policies and scalable care strategies to improve the management of chronic diseases like obesity and diabetes, particularly for pediatric populations.
